Resident/ Occupier

Dear Sir/Madam

Rescheduled A605 Kings Dyke road closure

We write to notify you of forthcoming rescheduled work on the A605 Peterborough Road, Whittlesey. The road closure had previously been planned to be undertaken in April, however, due to the COVID19 lockdown and the safety of our suppliers and sub-contractors we were unable to undertake the works.

From Thursday 30th July, a full road closure for just over two weeks will be in place to allow Lindum Construction to carry out utility works for their nearby housing development. This full closure is unavoidable due to their deep excavation work. Whilst this is underway, Jones Bros will take the opportunity to undertake advance work for the King's Dyke scheme, conducted under temporary traffic lights.

Lindum Construction and Jones Bros are working in collaboration so that the underground utility diversions for both projects can be carried out together to minimise disruption.

The carriageway is not wide enough to safely carry out Lindum Constructions’ works without closing the road. This is required for the safety of the workers and the public. We have therefore timed the closure within the Summer school holidays, when there is less traffic on the road. This should help minimise delays to the public. A signed diversion route will also be in place, the details of which are attached/enclosed. Allowances will be made to let pedestrians through and cyclists will need to dismount through the closure. Access to properties and businesses will be maintained but the approach will need to be from the side of the closure that is required.

Details of the works:

**Lindum Homes development**

Closing the A605 Peterborough Road from 7:00am on Thursday 30th July for a period of just over two weeks to enable Lindum Construction to complete a sewer connection for the new development and to divert underground utilities.

A new site entrance will also be formed to help minimise disruption from site traffic and any roads/paths affected by the construction works will be restored on completion. The closure extends to the area immediately adjacent to the Lindum Construction site, which is shown on the attached plan.
If you require further information about the Lindum Construction work please contact Richard Dobson (Lindum Site Manager on 07786 291134). Dean Bailey (Lindum Site Manager on 07881090252).

**King's Dyke crossing project, Jones Bros**

During the two week closure the King's Dyke advance work, conducted under temporary traffic lights, will continue.

This is advance work to allow construction of the King's Dyke scheme to start as planned later this year. This preparatory work involves diverting and lowering existing underground utilities where the new road will tie into the existing A605.

You can also keep up to date on the King's Dyke project online at [www.cambridgeshire.gov.uk/kings-dyke](http://www.cambridgeshire.gov.uk/kings-dyke) [www.facebook.com/kdercrossing](http://www.facebook.com/kdercrossing).

Please also note that should North Bank be closed by the Environment Agency then the A605 will be opened as soon as is reasonably practicable.

I hope this advance information has been helpful.

Yours sincerely

Richard Dobson

Lindum Construction Site Manager
